INDEX TO REPORTS AND MAPS

OF GENERAL INTEREST

INDEX DES RAPPORTS ET CARTES

D'INTÉRÊT GÉNÉRAL

Canada

REVISED/RÉVISÉ 1986

INTRODUCTION

This index comprises several categories of reports and maps of general interest which are grouped into broad subject divisions i.e. Economic Geology. Age determinations, illustrations of Canadian Fossils, etc.

A Memoir is a comprehensive report on the geology of a specific area; a Bulletin is a report on detailed scientific studies of any geological or related subject; Papers range from the presentation of accumulated data of progress; Miscellaneous Reports cover a wide range of topics of particular interest of the general public; and Economic Geology Reports are comprehensive reports on the geology of minerals and fuels in Canada.

For publications covering specific areas within a province or district, a list of reports and indexes to geological maps of the province(s) of interest will be supplied free of charge, on request. When ordering these lists and indexes, please specify the province(s) or district(s) of interest.

For a complete list of publications issued by the Geological Survey of Canada from its inception to December 1984, please refer to the following indexes.

INTRODUCTION

Le présent index comprend plusieurs catégories de rapports et cartes d'intérêt général qui sont groupés par grands centres d'intérêts, c'est-à-dire la géologie économique, les datations, les illustrations de fossiles canadiens, etc.

Le Mémoire est un rapport complet sur la géologie d'une région spécifique; le Bulletin est un rapport sur des études scientifiques détaillées sur un sujet géologique ou d'un domaine voisin; l'Etude va de la simple présentation de données rassemblées dans un rapport provisoire de très haut niveau comportant des interprétations; les Rapports divers couvrent une grande variété de sujets d'intérêt particulier pour le grand public; la Série de la géologie économique présente des rapports complets sur la géologie des minéraux et des conbustibles au Canada.

Pour les publications qui couvrent des régions spécifiques dans une province ou un district, une liste de rapports et les index des cartes géologiques de la province intéressée seront fournis gratuitement sur demande; pour les commander, ayez l'obligeance de préciser la province ou le district intéressés.

Pour avoir la liste complète des publications de la Commission géologique du Canada de sa création à décembre 1984, veuillez vous reporter aux index suivants.

For prompt release and various other reasons, many reports/maps resulting from geological, geochemical and geophysical surveys are first released as Open File documents. For most items released, master copies are deposited with commercial firms in several Canadian cities who will prepare duplicates on demand. Over the past few years some 1100 Open File items covering various regions in Canada have been issued.

Pour une diffusion plus rapide et aussi pour d'autres raisons, un bon nombre de rapports et cartes résultant d'études géologiques, géochimiques et géophysiques est publié sous la forme des dossiers publics. Pour un grand nombre d'entre eux, des originaux sont envoyés à des imprimeries de plusieurs villes canadiennes pour qu'ils puissent fournir sur demande des exemplaires. Depuis quelques années à peu près 1100 dossiers publics se rapportant à plusieurs régions du Canada ont été publiés.
